PROJECTS

💎 COURSE APP

Developed AGRLARK Course app using ReactJS, Chakra UI, Node.js, Express.js, and Redux, integrating subscription handling, user authentication, and content management features with technologies like Razorpay, Cloudinary, Nodemailer, and JWT.

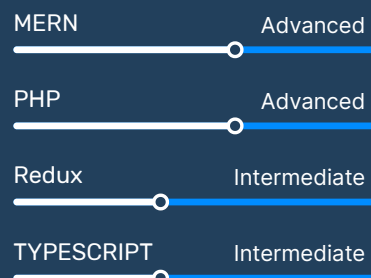

💎 NETFLIX UI APP

Crafted a Netflix clone UI project utilizing React.js, Vite.js, Node.js, and Express.js for seamless development and user interaction

💎 WEATHER APP

Created a Weather app with HTML and CSS, integrating a purchased API to display real-time weather and wind speed information for any location queried.

LANGUAGES

SUMMARY

- Innovative and results-oriented Full Stack developer with a proven track record of success in both personal projects and professional roles. Proficient in a diverse range of technologies including React.js, Redux, TypeScript, Node.js, MongoDB, Express.js, and Git. Skilled in developing dynamic web applications and user-friendly interfaces, with a specialization in the MERN stack. Experienced in creating subscription-based applications, weather apps, and UI clones for prominent platforms. Demonstrated ability to collaborate effectively in team environments, deliver high-quality solutions, and adapt to evolving industry trends. Interned at three different companies, gaining valuable hands-on experience and contributing to various projects. Seeking to leverage expertise and passion for software development in a dynamic and growth-oriented organization.
- Experienced in delivering projects swiftly and efficiently, honed through my tenure at Intouch Digital Institute Pvt Ltd, a service-based company known for its commitment to prompt project delivery. Worked extensively with React.js, PHP, HTML, CSS, and JavaScript to fulfill client requirements within tight deadlines. Adapted to the fast-paced environment, ensuring timely completion of tasks while maintaining the highest standards of quality.
